

24-Hour Double Swivel Elbow

Soft Sleeve

Highly compact and soft sleeve to effectively prevent infiltration of blood and sputum.

BIOTEQ 24-Hour Closed Suction Catheter set features safe and simple access for caring mechanical ventilated patient (either tracheomized or endotracheal intubation) on continuous suction without breaking the circuit throughout patient's time on the ventilator, an exclusive design prevent medical and nursing staff to get respiratory tract diseases in the suction process and reduce rate of nosocomial infection.

MDI (Metered Dose Inhaler) Port

Allows delivery of aerosol drugs as bronchodilators into the ventilator circuit to mechanically ventilated patients.

Double Swivel Connectors

With 360° swivel adapter provides optimal comfort and flexibility for both patient and nursing staff.

Precise Graduations

Clear graduation for convenient depth measurement.

Luer lock Irrigation Port

Provides needle-free access via a syringe to help prevent needle sticks.

ACCESSORY CODE:(If Flex tube is desired, then include a F in Model#.)
BT-SCX-XXXXNF:24-Hour DSE type+F(Flex Tube)

24-Hour Double Swivel Elbow 30° Bevel Elbow

Soft Sleeve

Highly compact and soft sleeve to effectively prevent infiltration of blood and sputum.

One-way Irrigation Port

Helps not only maintain the pressure of the ventilator circuit but also take the injection of normal saline to clean up the catheter after each suction procedure.

Precise Graduations

Clear graduation for convenient depth measurement.

30° Bevel Elbow

Provides optimal comfort flexibility for the patient.

MDI (Metered Dose Inhaler) Port

Allows delivery of aerosol drugs as bronchodilators like albuterol into the ventilator circuit to mechanically ventilated patients.

BIOTEQ 24-Hour Closed Suction Catheter set features safe and simple access for caring mechanical ventilated patient (either tracheomized or endotracheal intubation) on continuous suction without breaking the circuit throughout patient's time on the ventilator.

An exclusive design prevent medical and nursing staff to get respiratory tract diseases in the suction process and reduce rate of nosocomial infection.

30° Bevel elbow design assist in changing position of the ventilator circuit and provides optimal comfort flexibility for the patient.
